Special Issue:
Advances and Applications of Statistical Theory of Liquids
– A Collection of Invited Papers
in Honour of Professor I. Z. Fisher

Preface

Internal and thermal pressure in simple liquids
A.I. Burshtein (Novosibirsk, Russia) 1

Liquid: Local and globar order
A.Z. Patashinskii (Düsseldorf, Germany) 15

Dynamical states in liquid water
F. Aliotta and G. Maisano (Messina, Italy) 31

Thermal characteristics of amorphous solids
at low temperatures
N. P. Kovalenko, Yu. P. Krasny
and V. V. Mikho (Odessa, Ukraine) 45

Statistical theory of transport phenomena near
the liquid–gas interface
M. M. Shapiro (Tomsk, Russia) 65

Polarizational properties of strongly viscous liquids
and colloidal systems
S. V. Kuzmin and N. P. Malomuzh (Odessa, Ukraine) 81

On the application of the theory of inhomogeneous fluids
for the triplet and higher order distribution functions
M. F. Holovko and O.A. Pizio (Lvov, Ukraine)
A. D. J. Haymet and D. Henderson (Salt Lake City, USA) 101

Monte Carlo evaluation of the hydration free energy
for hydronium, hydroxyl and ammonium ions
F. Alicata, M. Migliore and S.L. Fornili (Palermo, Italy) 117

Water–mediated interactions of bisolutes: aspects of dynamics,
structure and configuration lifetime of the solvent
D. Bulone, P.L. San Biagio, M.B. Palma Vittorelli
and M.U. Palma (Palermo, Italy) 131

An analytical model for impact description of liquid phase relaxation processes
B.M. Abdrakhmanov (Alma-Ata), and S.I. Temkin (Novosibirsk, Russia) 163

Critical phenomena in finite-size systems
A.V. Chalyi (Kiev, Ukraine) 185
